

CosmiCode

Let's explore the galaxy together:)

C/1 – Welcome Screen

Student enters the Solar System simulation and begins their space journey.

C/2 – Meet the Sun

The Sun is at the center of our Solar System. It is a giant ball of hot gas that gives us light and energy.

Student learns that the Sun is the center of the Solar System and provides light and energy.

C/3 – Explore the Inner Planets ✨

- Mercury: Closest planet to the Sun; small and rocky.
- Venus: Hottest planet; thick clouds trap heat.
- Earth: Our home planet; supports life with air and water.
- Mars: The Red Planet; has rocks, mountains, and volcanoes.
- Students discover the unique features of the inner rocky planets

C/4 – Explore the Outer Planets

Jupiter: Largest planet; a gas giant with many moons.

- Saturn: Famous for its beautiful rings made of ice and rock.
- Uranus: An ice giant that rotates on its side.
- Neptune: Farthest planet; has the strongest winds in the Solar System.
- Students learn about the giant planets and their unique characteristics.

C/5 – Planet Challenge

Planet Challenge: Arrange the planets, match fun facts, and identify mystery planets! Track your score, race against the timer, and earn instant feedback as you become a Solar System expert.

C/6 – Achievement Screen

Achievement Unlocked! 🎉
Become a Solar System Explorer and earn exciting badges like Space Explorer, Planet Master, and Solar System Expert for completing all missions and challenges successfully. 🚀🏆🌟
