

FUNDAMENTAL RIGHTS AND DUTIES

PROJECT TITLE : CIVICS GUARDIAN

DESCRIPTION OF THE PROJECT :

This project is an interactive educational simulator designed for students of Classes 6 to 8. It helps learners understand the Fundamental Rights and Fundamental Duties of Indian citizens through engaging scenarios, quizzes, and decision-making activities. The simulator makes civics education more interactive and easy to understand.

PROBLEM STATEMENT :

Many students find civics topics such as Fundamental Rights and Duties difficult to understand through traditional textbook learning. There is a need for an engaging and interactive method that helps students learn these concepts through real-life situations and active participation.

SOLUTION :

The simulator presents students with different real-life scenarios related to Fundamental Rights and Duties. Users can choose responses, receive feedback, and learn the correct concepts through interactive learning. This approach improves understanding and retention of civic values.

FEATURES :

- 1.Interactive learning experience
- 2.Real-life scenario-based questions
- 3.Covers Fundamental Rights and Duties
- 4.Student-friendly interface
- 5.Instant feedback on responses
- 6.Suitable for Classes 6–8
- 7.Responsive design for different screen sizes

DEVELOPMENT TOOLS :

- 1.VSCODE
- 2.GIT

- 3.GITHUB
- 4.COPILOT
- 5.CHATGPT

DEPLOYMENT TOOLS :

- 1.VERCEL

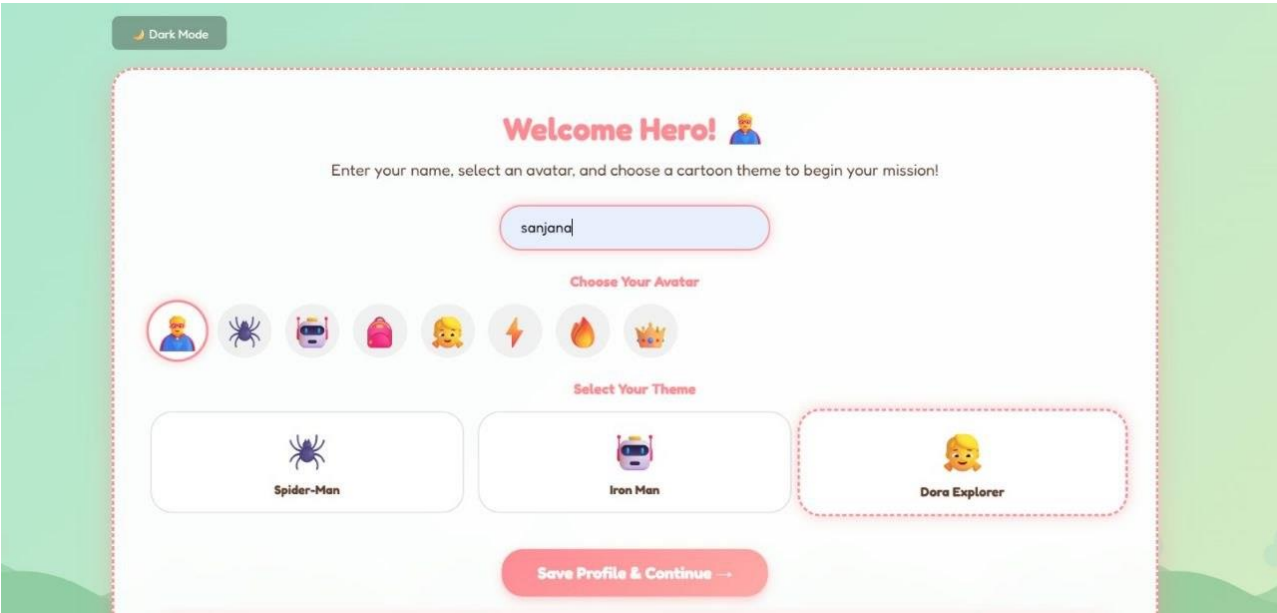

TECH STACK USED :

- 1.HTML
- 2.CSS
- 3.JavaScript

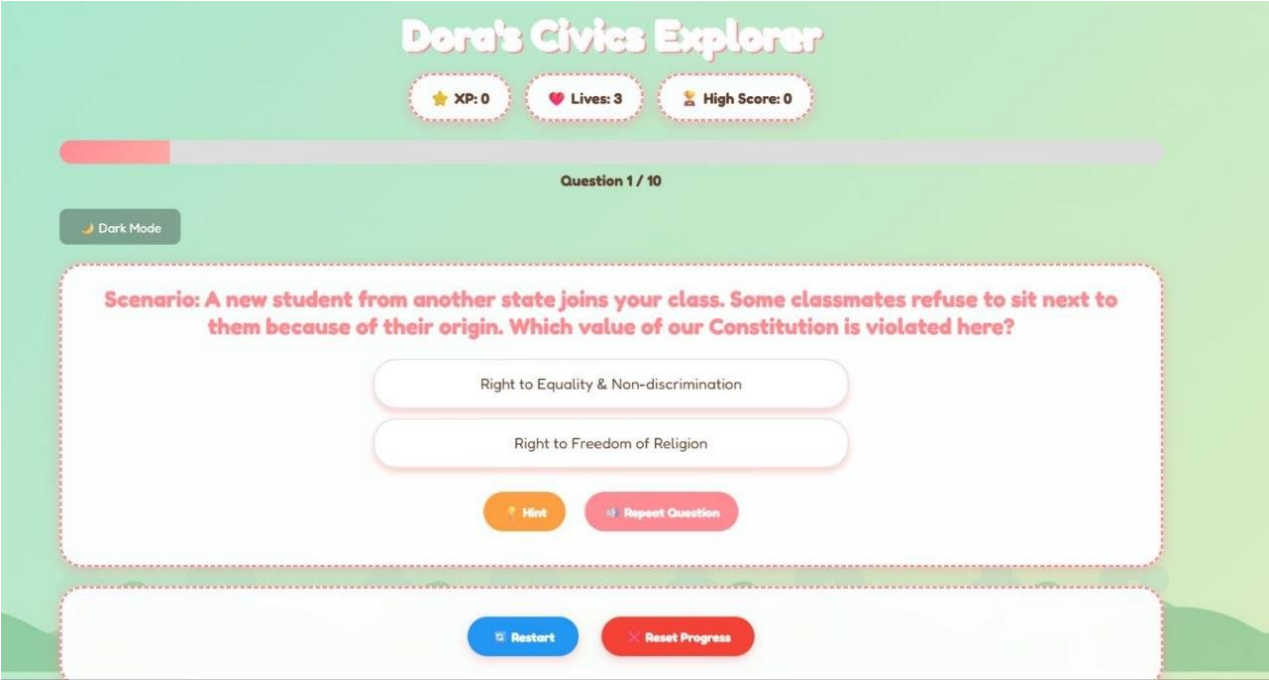

HOW TO RUN PROJECT :

- STEP 1-Download or clone the project files.
- STEP 2-Open the project folder in Visual Studio Code.
- STEP 3-Ensure all files (HTML, CSS, and JavaScript) are in the correct locations.
- STEP 4-Open index.html in a web browser or use Live Server.
- STEP 5-Interact with the simulator by selecting scenarios and answering questions.
